

Easter  
Sunday  
2018

- 1) Early on the first day of the week, while it was still dark, Mary Magdalene went to the tomb and saw that the stone had been removed from the entrance.
- 2) So she came running to Simon Peter and the other disciple, the one Jesus loved, and said, "They have taken the Lord out of the tomb, and we don't know where they have put him!"
- 3) So Peter and the other disciple started for the tomb.
- 4) Both were running, but the other disciple outran Peter and reached the tomb first.
- 5) He bent over and looked in at the strips of linen lying there but did not go in.

John 20

- 6) Then Simon Peter came along behind him and went straight into the tomb. He saw the strips of linen lying there,
- 7) as well as the cloth that had been wrapped around Jesus' head. The cloth was still lying in its place, separate from the linen.
- 8) Finally the other disciple, who had reached the tomb first, also went inside. He saw and believed.
- 9) (They still did not understand from Scripture that Jesus had to rise from the dead.)
- 10) Then the disciples went back to where they were staying.

John 20

# China's Social Credit System seeks to assign citizens scores, engineer social behaviour

Chinese authorities claim they have banned more than 7 million people deemed "untrustworthy" from boarding flights, and nearly 3 million others from riding on high-speed trains, according to a report by the country's National Development and Reform Commission.

As the national system is still being fully realised, dozens of pilot social credit systems have already been tested by local governments at provincial and city levels.

For example, Suzhou, a city in eastern China, uses a point system where every resident is rated on a scale between 0 and 200 points — every resident starts from the baseline of 100 points.

One can earn bonus points for benevolent acts and lose points for disobeying laws, regulations, and social norms.
